DE: +49 2102 745 4500 | UK: +44 [0] 800 783 2737 - Option 2 3

If your account is in good standing, the Pace Support team will assist with the following:

- **Hardware:** Support for EFI-provided hardware within the scope of the agreement.
- **Defect Repair:** Correction of material defects in the licensed software so that it will operate materially in conformity with warranties set forth in the License Agreement.
 - **Note:** To request system enhancements for items that are not defective, please enter requests via the Support site or request support for your idea on the Pace Users' Group. The Pace Product Management team reviews all suggested enhancements weekly and has direct interaction with the Pace Users' Group leaders.
- **Customization Requests:** To modify modules in your licensed environment to support your unique business requirements, request a customization evaluation via the Support site or email Pace.Customizations@efi.com.
 - **Note:** Your maintenance agreement does NOT include customer-authored customizations, custom forms or reprogramming due to customizations.
 - **Note:** A 10-hour professional services engagement will be required to process customizations.
- **Upgrades:** Periodically, we make updated versions of your licensed Pace base system and/or additional modules available for self-service upgrades. The updated versions incorporate corrections of any material defects, fixes of any minor bugs and may include additional new features. All upgrades are your responsibility to install. Minor and major release upgrades are available and can be performed via your system Admin Console. Major upgrades require using the Upgrade Guide.
 - **Note:** Pace Support does NOT provide training on updated versions. For Training assistance, please contact Pace Professional Services team at PaceScheduling@efi.com
- **Brief Consultations:** Telephone or email/electronic consultation services for questions or problems regarding the use of the licensed software within the scope of the standard system during our standard support hours.
 - **Note:** Your software maintenance agreement does NOT include training time. To discuss complex workflows or in-depth training, contact your local Pace Professional at PaceScheduling@efi.com
- **Documentation:** New documentation, as written, such as online Help & FAQs, Release Notes, and University of Pace tutorials.
- **Licensing:** Support for licensed Pace software modules (including current access codes for active accounts in good standing).

- **Note:** For inquiries regarding purchase or demo of additional modules or user licenses, please call Pace Sales at 800-624-5999 and select **option 4 Sales**
- **Policy for Customization Toolkit, API, Xpath, and Report Writing Modules:**

Support is defined as defect repair, enhancement requests and affirmation of capabilities within a module. Setup of third-party programs, questions on design, coding, troubleshooting, workflows, best practices or any other requests are billable services fulfilled at the current standard rate.

 - **Note:** If EFI Pace determines that the issue is an EFI Pace or Supported application (Crystal Clear) defect, the billable time may be credited.
